*A Solari Subscriber Event*

*After our successful Hang in Stavoren, The Netherlands in 2019 and memorable events in Uluru, Australia in 2018, we agreed to create more opportunities for in-depth meetings and discussions with Solari Report subscribers.*

*Catherine first joined Ulrike at the Bregenz Festival in 2016 and has returned every summer since.*

The high-quality opera performances on the world's largest floating stage (Seebühne) on Lake Constance, the concerts by the Vienna Symphony Orchestra, and the natural aesthetics and energy of the lake itself—where Switzerland, Austria, and Germany converge—make for a multi-layered and entirely inspiring experience. Lake Constance provides the ideal backdrop for a very special gathering of Solari subscribers to engage in amazing discussions—and to enjoy some of the finest music in the world.

Our 2020 Solari Hang will take place on August 8-14, 2020 in Lindau, on the German side of Lake Constance. Our goal is to give participants a chance to interact fully with all the members of the Solari team. This is an opportunity to learn, to explore, and to share in culture and the arts while getting to know an amazing group of like-minded people. Weather permitting, we also look forward to swimming in the lake, going on bicycle rides, hiking, or simply relaxing outdoors.

The theme of this Hang is “building actionable intelligence.” We want to address it through several presentations on the

profound implications of recent developments in technology—5G, AI, and entrainment. We'd like to explore and integrate “actionable intelligence” in these matters into our daily decision-making. Our discussions will focus on the impact of technology on our health, our consciousness, and our spiritual integrity and well-being. Presentations by Jason, Ulrike, and Catherine will provide the basis for our morning discussions, conversations over lunch, and during our cultural program. We think that hanging out together in a private setting will allow lasting insights to emerge. What can we do in our daily lives to help us and those around us to live a free and inspired life?

We want to have a good time, to be inspired by some of Europe's finest musical masterpieces and the beauty and energy of Lake Constance, and to enjoy each other's company!

# ABOUT LAKE CONSTANCE

## *Catherine loves Lake Constance!*

*And when you come and experience this region, you will know why. Lake Constance (a.k.a. Bodensee) is one of the most beautiful areas in central Europe. The lake, being the third largest of central Europe, covers an area of 536 square kilometers (about 207 square miles) and connects the countries of Germany, Austria, and Switzerland.*

**Lake Constance** is also an important drinking water source for some 4.5 million people in Germany and Switzerland. The lake's waters are primarily fed by the Alpine Rhine from Switzerland. The sheer size of this body of water and its great depth (250 meters) produce a microclimate all its own and milder temperatures. This often allows for Mediterranean trees and plants to thrive and has turned the whole region into a productive fruit and wine-growing landscape. Nevertheless, the area can also experience powerful storms and winds that race across the water.

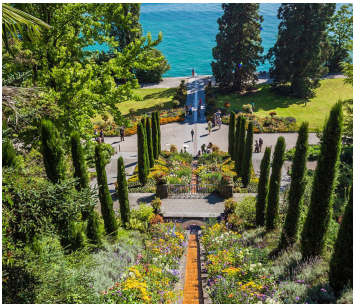

The lake is popular for sailing, surfing, swimming, and cycling along its shores. An annual sailing regatta around the lake called the *Rund Um* ("all around") takes place every summer, and a magnificent ship procession with prayer and water consecration occurs each year on the day of the Assumption of Mary on August 15.

Important social and historical places and events at Lake Constance include the Council of Constance (1414-1418) that was held to end the Papal Schism. The city of Friedrichshafen, an important trade and industrial center, has been at the forefront of naval and aviation innovation since 1824, when the first steamboat was built to travel Lake Constance. In 1900, the first Zeppelin airship started from the lake.

Many aviation, weaponry, and space technology companies are still linked to Friedrichshafen, such as Dornier (former Zeppelin Werke and today part of Airbus Defence and Space), ZF Friedrichshafen (the world's second largest car parts manufacturer), and MTU and Rolls-Royce Power Systems (producing high-speed engines and propulsion systems for ships and land, rail, and defense vehicles). Altogether, there are about 20 arms manufacturers and security engineering companies along Lake Constance.

**Lindau** is a town and historic island on the eastern end of Lake Constance, with historical documentation dating back as early as 882. Some of its buildings, such as Saint Peter's Church, go back 1000 years. It is a popular tourist destination due to its historic buildings, the harbor, and a beautiful panorama of the lake.

Every year since 1951, Lindau has hosted the Lindau Nobel Laureate Meetings which bring over 30 Nobel science laureates to the town—representing the largest convention of Nobel laureates in the world. These annual meetings host a full series of lectures, master classes, and panel discussions that alternate between a focus on the three natural sciences of physiology and medicine, physics, and chemistry. During this time, hundreds of young scientists, PhD students, and postgraduates from over 80 countries flood the town to engage in lively scientific discussions.

Each year, the science laureates visit the Island of Mainau on the last day of the meetings—just as our group of Solari subscribers will do during the Hang.

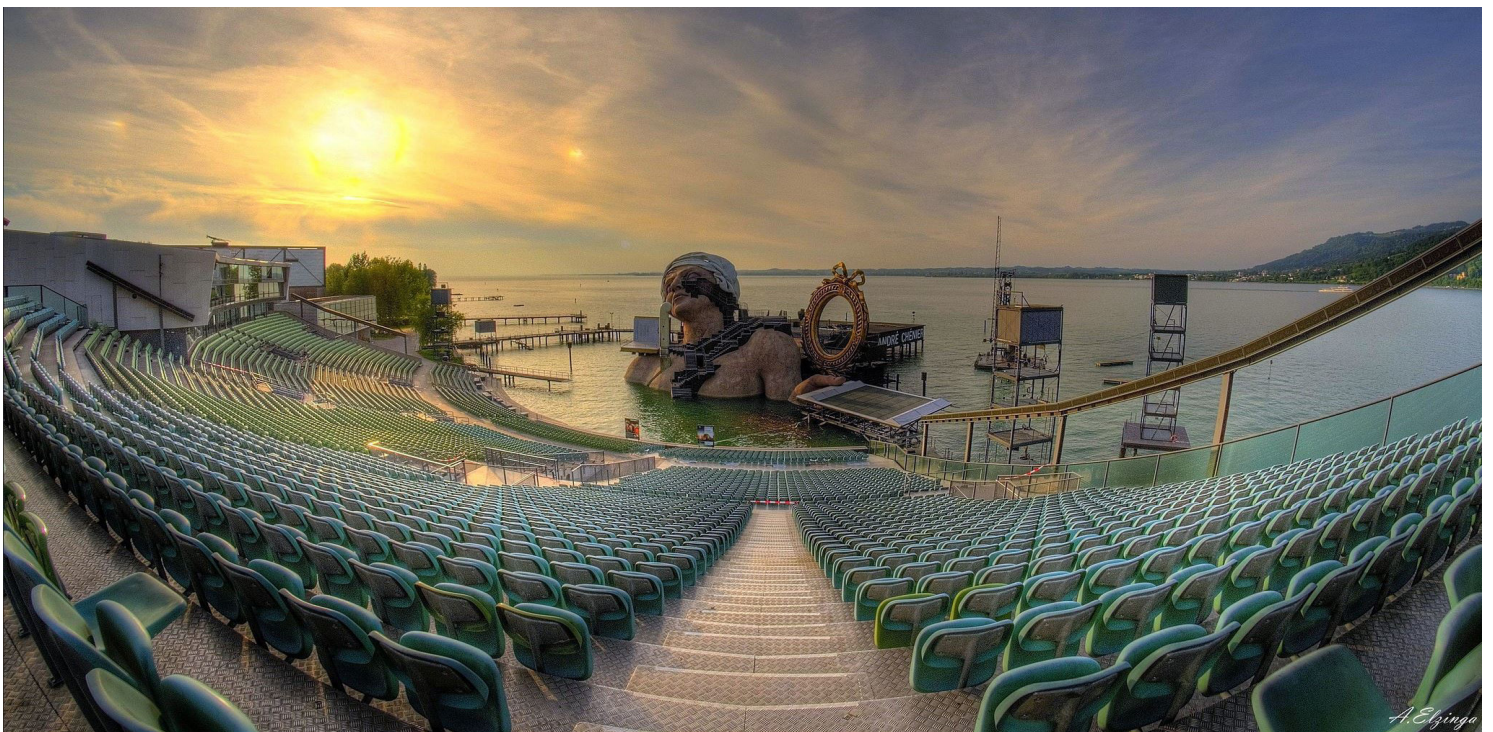

**Bregenz** is the capital of the western Austrian province of Vorarlberg, situated along the Austrian shores of Lake Constance. Early settlements date back to 1500 BC. Perhaps due to its vicinity to Switzerland and Germany—and the opening to the world that the enormous lake provides—Bregenz has developed an unusual wealth of artistic and cultural events that draw thousands of visitors each year.

**The Bregenz Festival**, which features the world's largest floating stage—is an open-air amphitheater with 7000 seats that are fully booked each night during the Festival. The first edition of the festival was held in 1946—immediately attracting an international audience.

Because the town lacked a theater, the week's events were staged on barges moored on Lake Constance, launching the festival's signature commitment to floating stage opera productions.

This unique and “epic” staging of opera draws tens of thousands of spectators annually. Over 200,000 people attended the Festival's record-setting lake stage production of Mozart's *The Magic Flute* in 2014, which played to 100% capacity. The lake stage also features one of the world's best open-air sound systems.

FESTIVAL'S ORCHESTRA

## THE VIENNA SYMPHONY ORCHESTRA

“VIENNA'S “CULTURAL AMBASSADOR AND PREMIER  
CONCERT ORCHESTRA”

*During our Hang 2020, all participants will enjoy both an indoor symphony performance of works of Ludwig van Beethoven and Richard Strauss by the Vienna Symphony Orchestra as well as a performance of the Giuseppe Verdi opera Rigoletto on the lake stage of the Bregenz Festival.*

The Vienna Symphony Orchestra has been the Festival's orchestra since the beginning, playing a major role in the Festival's enduring success. It is considered Vienna's “cultural ambassador and premier concert orchestra” and one of Europe's most prestigious orchestral ensembles. Founded in 1900, the orchestra is known for its commitment to traditional, Viennese orchestral sound, which it shows off in a core repertoire focused on works from the Romantic era. The orchestra

has been in residence at the Bregenz Festival since the Festival's inception; it is not only responsible for the Festival's indoor and outdoor opera productions but also regularly headlines orchestral concerts on the Festival program.

2019 & 2020 LAKE STAGE PERFORMANCE OF

## RIGOLETTO

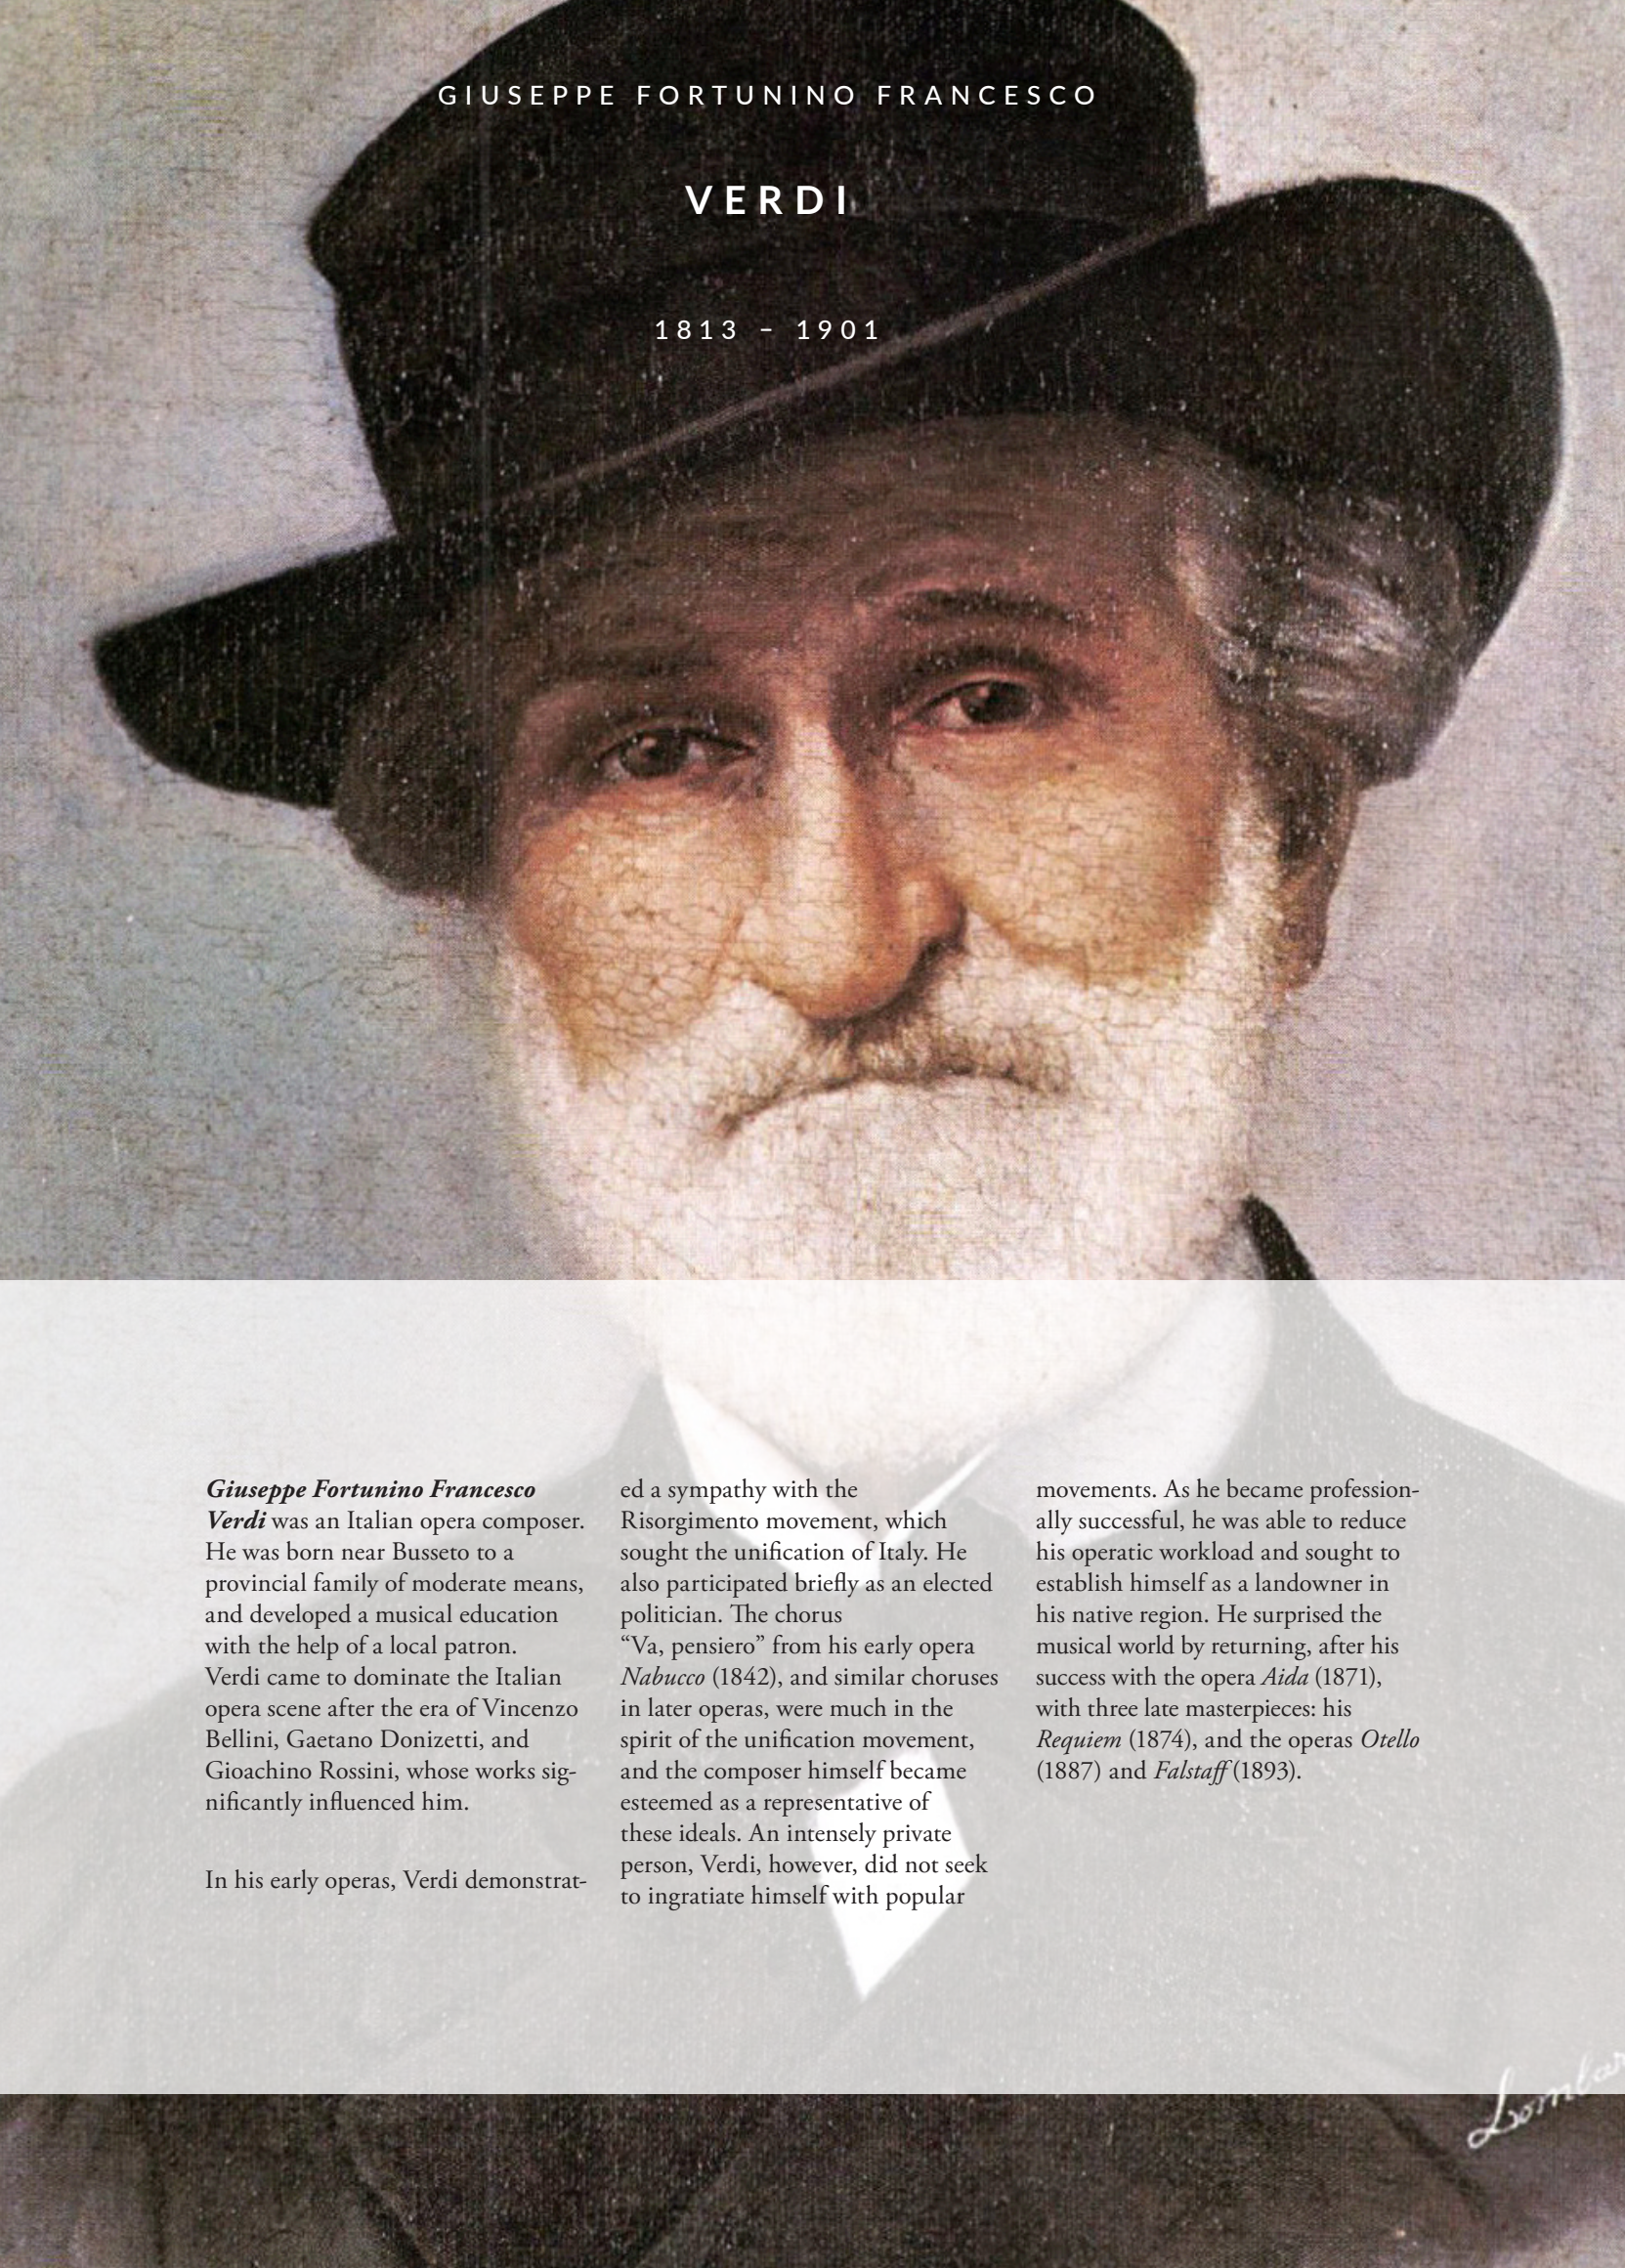

*Rigoletto is an opera in three acts by Giuseppe Verdi. The Italian libretto was written by Francesco Maria Piave based on the play *Le roi s'amuse* by Victor Hugo. Despite serious initial problems with the Austrian censors who had control over northern Italian theaters at the time, the opera had a triumphant premiere at La Fenice in Venice on 11 March 1851.*

*Rigoletto* is a staple of the operatic repertoire. It had its first performance in 1851, based on Victor Hugo's play *The King Amuses Himself*. Following extended negotiations with censors, Verdi and his librettist changed the plot's womanizer to a duke and named the duke's jester Rigoletto.

It is widely considered to be the first of the operatic masterpieces of Verdi's middle-to-late career. Its tragic story revolves around the licentious Duke of Mantua, his hunch-backed court jester Rigoletto, and Rigoletto's beautiful daughter Gilda. The opera's original title, *La maledizione* (*The Curse*), refers to a curse placed on both the Duke and Rigoletto

by a courtier whose daughter the Duke has seduced with Rigoletto's encouragement. The curse comes to fruition when Gilda falls in love with the Duke and sacrifices her life to save him from the assassin hired by her father.

A detailed oil painting of Giuseppe Verdi, showing him from the chest up. He is wearing a dark, wide-brimmed hat and has a full, white beard and mustache. His expression is serious and contemplative. The background is a soft, neutral tone.

GIUSEPPE FORTUNINO FRANCESCO

VERDI

1813 - 1901

***Giuseppe Fortunino Francesco***

***Verdi*** was an Italian opera composer. He was born near Busseto to a provincial family of moderate means, and developed a musical education with the help of a local patron. Verdi came to dominate the Italian opera scene after the era of Vincenzo Bellini, Gaetano Donizetti, and Gioachino Rossini, whose works significantly influenced him.

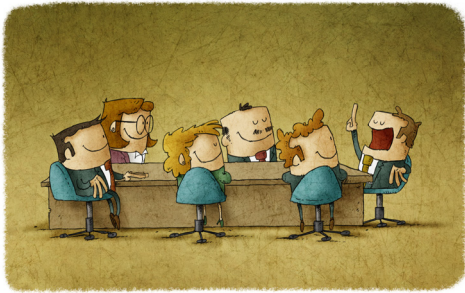

In his early operas, Verdi demonstrat-

ed a sympathy with the Risorgimento movement, which sought the unification of Italy. He also participated briefly as an elected politician. The chorus "Va, pensiero" from his early opera *Nabucco* (1842), and similar choruses in later operas, were much in the spirit of the unification movement, and the composer himself became esteemed as a representative of these ideals. An intensely private person, Verdi, however, did not seek to ingratiate himself with popular

movements. As he became professionally successful, he was able to reduce his operatic workload and sought to establish himself as a landowner in his native region. He surprised the musical world by returning, after his success with the opera *Aida* (1871), with three late masterpieces: his *Requiem* (1874), and the operas *Otello* (1887) and *Falstaff* (1893).

ACADEMY FOR FUTURE SCIENCE

“

*We are as much in space as “space” is within us.*

∞

*What is on the other side of space? Let us realize that the shift to a physics of spacetime, a physics of consciousness has already taken place.*

”

Ulrike heads the Academy for Future Science in Europe and has been lecturing for many years on science, meditation, and consciousness based on the best-selling book *The Keys of Enoch* by J.J. Hurtak. In her workshops, she uses current science to provide a deeper and modern understanding of scripture and teaches a unique form of meditation with sacred sounds and sacred names to activate a transformative experience for the human mind.

She has worked with Russian Professor V.P. Kaznacheev and Dr. A.V. Trofimov in Novosibirsk on publications regarding the consciousness effects of the “Kozyrev Mirror” and the epigenetic effects of the “hypo-mag-

netic chamber.”

Ulrike has done many years of research with Hartmut Müller on the interscalar model of the universe that shows a mathematical interconnectedness of all scales of matter-energy, from the cosmological to the biological down to the interactions of subatomic particles. She also has lectured in Cairo, Egypt with the group of Dmitri Pavlov (Research Institute of Hypercomplex Systems) looking at the nature of pyramidal spaces.

Ulrike created and hosts the *Future Science Series* for The Solari Report.

YOUR  
TRANSPORTATION  
OPTIONS

FLY INTO  
ZRH, MUC, OR FDH

Those arriving by plane should fly into either the Zurich (ZRH) or Munich (MUC) airports and take the train from there to Lindau (Bodensee), Germany. **Do not make the mistake of going to Lindau, Switzerland, which is in the Zurich canton!** There is also a small local airport at Friedrichshafen (FDH) only 30 minutes from Lindau that has connecting flights to Frankfurt (FRA).

From the Zurich airport, take a train (2.5 hours)  
Swiss Rail services: <https://www.sbb.ch/en/>

From the Munich airport, take a train (3.5 hours)  
German Rail services: <https://www.bahn.com/en/>

Once in Lindau, the train station is about two miles from the Hotel Bad Schachen where the Solari Hang will be based.

Please take a taxi to get to the hotel from the train station.

If you are driving a car, the GPS coordinates for Hotel Bad Schachen are:  
N47.557950 | E9.665971

There is a parking lot in front of the hotel (for hotel guests only).

HOTEL

BAD SCHACHEN

LINDAU

Our meetings will take place in the extraordinary Hotel Bad Schachen in Lindau, Germany. The continuously family-owned hotel is one of the most exceptional places in Lindau and boasts a history of over 250 years as a spa. It is situated on the shore of Lake Constance with a stunning view of the lake, the island of Lindau, and the Austrian and Swiss mountains on the other side.

Solari has arranged a contingent of rooms at Hotel Bad Schachen for those attending the Hang. Please make your own booking using the code “SOLARI” when you contact reception. Book your accommodation from Saturday, August 8, 2020 through checkout on the morning of Friday, August 14, 2020. You are responsible for your booking, including any cancellations of rooms.

## SOLARI EVENT TERMS & CONDITIONS

*~ Please make sure you have read the Solari Event Terms & Conditions. ~*

Our terms and conditions reflect our desire for private gatherings, where we build trust that comes from respecting each other's privacy and creating a safe opportunity to share ideas and information that are personally important to each of us.

Please note that cell phones are not allowed in the morning sessions. During afternoon excursions, we request that cell phones be turned off with the exception of taking pictures.

**1. Guests:** Subscribers may register paying guests who are non-subscribers, but please make sure your guests are comfortable with Solari content.

**2. Digital Devices:** Our goal is to achieve an intimate atmosphere where we can speak freely. Please leave all cell phones, tablets, and other recording or communication devices in your room for the morning sessions. If you wish to take pictures during the excursions, please only do so with the express permission of the people involved.

**3. Respect for Privacy:** Please respect the privacy of the other subscribers and guests in attendance. Do not quote them outside of the event without their permission. The Chatham House Rule applies.

**4. Sharing of E-mails:** If you wish to exchange e-mails with others in attendance, please do so directly.

**5. Manners:** Solari subscribers are a well-mannered group. However, on the off chance that someone comes who is not, we reserve the right to ask anyone to leave who violates these policies and/or who—in Catherine's sole discretion—may compromise the safety, security, and productive discussions of our sessions or our group.

**6. Cancellation:** To be eligible to receive a refund (less a \$500 nonrefundable administrative fee), you must cancel no later than April 1, 2020. Solari will make every effort to remarket your spot; however, we will refund your payment (less the \$500) only if we succeed in finding a replacement.
